CPS312 Project Submission Procedure and Paperwork:

1. Have your documented code placed in a directory in your Joshua account.
    a. Include an "executable file" in the directory.
2. Have your writeup in the same directory
    a. The writeup will include a short description of your approach to creating the software for this project. Especially highlight any unique or strange sections of code. Also highlight any sections of code your are especially proud of.
    b. The writeup will also include the set of testcases used to test your resulting software – along with their results. Be sure these testcases – thoroughly test the software.
    c. The writeup will need to be in word or pdf format.
3. In class on the deadline for the project, hand-in a filled out coversheet with the proper categories filled out. Also attach any and all hardcopies specified by the project requirements.

An electronic copy of the coversheet can be found at:
