

Use Case: Add a copy of a DVD or game Disk

Precondition: This DVD or Disk is not already in the database

Actor: Manager

Goal: To add a DVD/Disk to the store inventory

Overview:

When a new copy of a DVD or Disk is acquired, the Manager accesses the system and records the copy into the database, selecting the Title under which it belongs. This item is added to the database, and its status is set to indicate that it is on the shelf.

Cross-reference:

R1a, R1b, R1c, R3c, R4b, R6b, R6, R8a, R8b, R8c

Typical course of events:

Actor Action	System Response
1. The Manager enters the information to add a new DVD or Disk to the system.	2. The system generates, records, and displays an ID number for this new item, and it is added to the database.
